## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 41 – 68 and 75 – 76 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on July 8, 2005.

Applicant's election with traverse of Group I in the reply filed on July 8, 2005 is acknowledged. The traversal is on the ground(s) that there is no serious burden on the examiner to search the additional invention. This is not found persuasive because the these inventions are distinct and have acquired a separate status in the art as shown by their different classification, which would necessitate searching additional classes not required by the first invention, thereby creating serious burden to the examiner.

The requirement is still deemed proper and is therefore made FINAL.

### ***Double Patenting***

Claims 1 – 40 and 69 – 74 are rejected under the judicially created doctrine of double patenting over claims 1 – 76 of U. S. Patent No. 6,717,029 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: both the claimed invention and U.S. Patent No.

Art Unit: 3761

6,717,029 are directed toward an absorbent article and method of making such comprising a core having a maximum Distribution Index.
